U.S. INTERNATIONAL TRADE IN GOODS AND SERVICES

January 1994

This release replaces the U. S. Bureau of the Census' monthly report U.S. Merchandise Trade (FT900) and U. S. Bureau of Economic Analysis' quarterly report Merchandise Trade - Balance of Payments Basis. See Announcement on page 3.

Goods on a Balance of Payments Basis and Services

The Bureau of the Census and the Bureau of Economic Analysis, through the Department of Commerce announced today that total January exports of \$54.5 billion and imports of \$60.8 billion resulted in a goods and services trade deficit of \$6.3 billion, \$2.2 billion more than the \$4.1 billion of December. January exports were \$2.8 billion less than December exports of \$57.3 billion. January imports were \$0.6 billion less than December imports of \$61.4 billion.

For goods, the January trade deficit was \$11.0 billion, \$2.3 billion more than the December deficit of \$8.7 billion. The January services surplus of \$4.7 billion was \$0.1 billion more than the December surplus of \$4.6 billion.

Exports of goods for January were \$38.7 billion. This represented a \$2.7 billion decline from December's \$41.5 billion and \$0.6 billion more than the 1993 average of \$38.1 billion. Exports of services for January were \$15.8 billion, virtually the same as in December and

\$0.2 billion more than the 1993 average of \$15.6 billion.

Imports of goods for January were \$49.8 billion. This represented a \$0.5 billion decrease from December's \$50.2 billion and \$0.7 billion more than the January to December 1993 monthly average of \$49.1 billion. Imports of services for January were \$11.0 billion, \$0.2 billion less than December's \$11.2 billion and \$0.1 billion more than the January to December 1993 monthly average of \$10.9 billion.

The three-month moving averages for January showed total exports of \$55.5 billion and total imports of \$61.5 billion, resulting in a deficit of \$6.0 billion. Exports were \$0.2 billion less than the December average of \$55.6 billion, while imports were \$0.9 billion less than the December average of \$62.3 billion.

Selected Services Details

The December to January change in services exports reflected decreases in other private services and other transportation and increases in military sales contracts, passenger fares, travel, royalties and license fees and U.S. Government miscellaneous services.

The December to January change in services imports reflected decreases in travel, other transportation, passenger fares and direct defense expenditures and increases in royalties and license fees, U.S. Government miscellaneous services and other private services.

Selected Seasonally Adjusted Goods Details on a Census Basis

The December to January change in exports reflected decreases in capital goods (\$1.0 billion), industrial supplies and materials (\$0.8 billion), foods, feeds, and beverages (\$0.3 billion), other goods (\$0.3 billion), automotive vehicles, parts and engines (\$0.2 billion), and consumer goods (\$0.1 billion).

The December to January change in imports reflected decreases in automotive vehicles, parts and engines (\$0.4 billion), other goods (\$0.2 billion), industrial supplies and materials (\$0.1 billion), and increases in capital goods (\$0.3 billion), consumer goods (\$0.2 billion), foods, feeds and beverages (\$0.1 billion).

For non-petroleum products, January exports were \$39.0 billion, \$2.6 billion less than the \$41.5 billion of December. Imports were \$46.3 billion, virtually the same as in December.

In 1987 constant dollars, January exports were \$38.1 billion, \$2.7 billion less than the \$40.8 billion of December. Imports of \$49.0 billion were virtually the same as in December.

Selected Not Seasonally Adjusted Goods Details on a Census Basis

The January figures showed surpluses in billions of dollars with Australia \$0.4 (\$0.5), Mexico \$0.3 (\$0.2), Argentina \$0.2 (\$0.3), Egypt \$0.2 (\$0.2), Western Europe \$0.2 (-\$0.3) and Korea virtually zero (\$0.1). Deficits were recorded in billions of dollars with Japan -\$4.6 (-\$5.3), China -\$2.2 (-\$1.3), Canada -\$1.1 (-\$0.8), Taiwan -\$0.6 (-\$0.6), OPEC -\$0.3 (-\$0.2), Hong Kong -\$0.1 (\$0.2), Brazil virtually zero (\$0.2). The December balances are shown in parentheses.

Exports of manufactured goods at \$29.7 billion were \$2.7 billion less than the \$32.4 billion of December and \$0.7 billion less than the \$30.4 billion January to December 1993 monthly average. Imports of manufactured goods at \$38.9 billion were \$2.1 billion less than the \$41.1 billion of December and \$1.1 billion less than the \$40.0 billion January to December 1993 monthly average.

Advanced technology products (ATP) exports were \$9.6 billion for January and imports were \$6.7 billion, resulting in a surplus of \$2.9 billion, \$0.1 billion less than the December surplus of \$3.0 billion. January exports were \$1.3 billion less than the \$10.9 billion of December, while imports were \$1.2 billion less than the \$7.9 billion of December.

Imports of energy-related petroleum products were \$3.1 billion. Of this, crude oil was \$2.3 billion, \$0.3 billion less than the \$2.6 billion in December. January crude oil imports at 195 million barrels were 13 million barrels less than the 208 million barrels of December and 17 million barrels less than the January to December 1993 monthly average. The January crude oil average price per barrel (\$11.61) was \$.65 less than the \$12.26 of December and \$3.52 less than the January to December 1993 average price of \$15.13.

Carry-over in January was \$0.3 billion (0.8 percent) for exports and \$0.4 billion (0.9 percent) for imports. For December revised exports carry-over was virtually zero, revised down from 0.3 billion (0.7 percent). For December revised imports carry-over was \$0.1 billion (0.2 percent) revised down from \$0.4 billion (0.8 percent).

Replacing the U.S. Merchandise Trade Report with the U.S. International Trade in Goods and Services Report

Effective with this release, the monthly Bureau of the Census report on U.S. Merchandise Trade is being replaced by the monthly report on U.S. International Trade in Goods and Services issued jointly by the Bureau of the Census (Census) and the Bureau of Economic Analysis (BEA). This report provides a more complete picture of U.S. trade by including new monthly estimates of trade in services compiled by BEA along with monthly Census data on trade in goods. In addition, the total import and export values for goods are presented on a Balance of Payments (BOP) basis.

For goods, although the expanded report highlights the total value of imports and exports on a BOP-basis, the report continues to provide the data on the old, "Census" basis. This will allow data users to maintain their time series and allow them to analyze the differences in the two data series. All detailed import and export data, including the end-use, SITC, country and world area data, continue to be presented on a Census basis.

These changes are being made to provide a more comprehensive monthly measure of trade and to improve the consistency of the trade data published by the Department of Commerce. With these changes, the monthly data are presented on the same basis as that published by the BEA in the quarterly BOP accounts.

Trade in Services

The most significant change in this report is the provision of monthly data on trade in services. The production of this data follows extensive research by the BEA to develop methodologies to produce monthly services estimates.

In addition, to the total value of imports and exports of services, the BEA has created estimates for seven major services categories. The BEA issues information quarterly by partner country in the March, June, September and December issues of the <u>Survey of Current Business</u>.

Trade in Goods

The report presents total values for exports and imports of goods on both a BOP-basis and a Census basis. The Census basis data, previously featured in the monthly report, are compiled from documentation collected by the U.S. Customs Service and reflect physical movements of goods into and out of the customs territory of the United States.

The BEA makes adjustments to convert the Census basis trade data to a BOP-basis. These adjustments are for coverage and valuation to bring the data in line with the concepts and definitions used to prepare the international and national accounts. Generally, adjustments reflect changes in the ownership of goods that occur without passing into or out of the customs territory of the United States. Adjustments are also necessary to supplement coverage of the Census basis data or to eliminate duplication of transactions recorded elsewhere in the international accounts, and to value transactions to reflect a standard definition.

Summary of Changes in Data Presentation

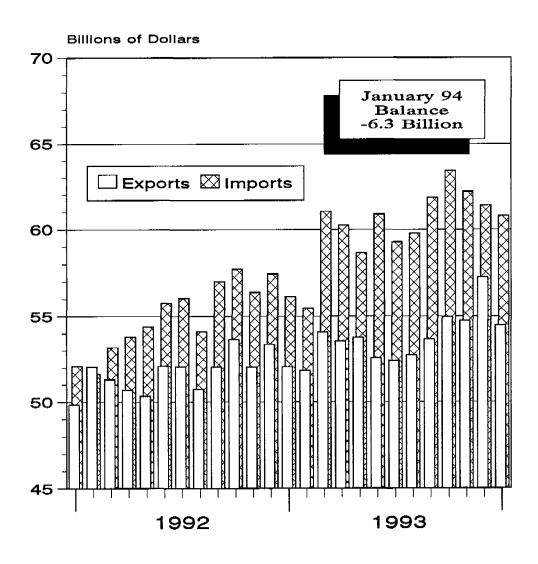

| Old Release | New Release |
|---|---|
| U.S. Merchandise Trade (FT-900) | U.S. International Trade in Goods and Services (FT-900) |
| All Exhibits | All Exhibits |
| The term "merchandise trade" has been replaced with "goods". | The term "Census basis" refers to data shown exactly as in the "old" release. The term "merchandise" has been replaced with "goods". |
| Exhibit 1 - Chart | Exhibit 1 - Chart |
| Replaced with a new chart. | New chart showing exports, imports and trade balance in goods and services. |
| Exhibit 2 - Exports, Imports, and Merchandise Trade Balance, Monthly and Three Month Moving Average | Exhibit 2 - U.S. Trade in Goods and Services (Seasonally Adjusted) |
| Information on merchandise trade is now shown in new Exhibit 6. Three-month moving averages are now provided for the exports, imports, and balance in goods and services (see new Exhibit 3.) | Exhibit has been redesigned to show exports, imports, and balance for goods and services and totals. Now on a Balance of Payments (BOP) basis. |
| Exhibit 3 - Exports, Imports and Merchandise Trade Balance, Petroleum and Non-Petroleum End-Use Commodity Category Totals | Exhibit 3 - U.S. International Trade in Goods and Services Three-Month Moving Average (Seasonally Adjusted) |
| Information remains available in new Exhibit 10. | New exhibit. Similar to three-month moving averages of old Exhibit 2, except provides exports, imports, and balance of goods (on a BOP basis) and services. |
| Exhibit 4 - Exports and Imports by Principal End-Use Commodity Category | Exhibit 4 - U.S. Services by Major Category - Exports (Seasonally Adjusted) |
| Information remains available in new Exhibit 7. | New exhibit that provides totals for exports of services and seven major categories. |
| Exhibit 5 - Exports By End-Use Category and Commodity | Exhibit 5 - U.S. Services by Major Category - Imports (Seasonally Adjusted) |
| Information remains available in new Exhibit 8. | New exhibit that provides totals for imports of services and seven major categories. |
| Exhibit 6 - Imports By End-Use Category and Commodity | Exhibit 6 - U.S. Trade in Goods (Seasonally Adjusted) |
| Information remains available in new Exhibit 9. | New exhibit that provides exports, imports, and balance of goods totals. Goods totals are provided on a Census basis and a BOP basis. Adjustments are provided to convert goods from a Census basis to a BOP basis. |

| Exhibit 7 - Exports, Imports, and Merchandise Trade Balance, Petroleum and Non-petroleum End-Use Commodity Category Totals (Constant Dollar Basis) Most information remains available in new Exhibit 11. Totals only are provided (the trade balance and Petroleum - Non-petroleum totals are not shown). | Exhibit 7 - Exports and Imports of Goods by Principal End-Use Category (Seasonally Adjusted) Substantially the same as old Exhibit 4. In addition, totals are provided on a Census basis and a BOP basis. Adjustments are provided to convert the goods totals from a Census basis to a BOP basis. | | | | |
|--|---|--|--|--|--|
| Exhibit 8 - Exports, Imports, by Principal End-Use Commodity Category (Constant Dollar Basis) | Exhibit 8 - Exports of Goods by End-Use Category and Commodity (Seasonally Adjusted) | | | | |
| Information remains available in Exhibit 11. | Substantially the same as old Exhibit 5. In addition, totals are provided on a Census basis and a BOP basis. Adjustments are provided to convert the goods totals from a Census basis to a BOP basis. | | | | |
| Exhibit 9 - Exports, Imports and Merchandise Trade Balance (Not Seasonally Adjusted) | Exhibit 9 - Imports of Goods by End-Use Category and Commodity (Seasonally Adjusted) | | | | |
| Information remains available in Exhibit 12. | Substantially the same as old Exhibit 6. In addition, totals are provided on a Census basis and a BOP basis. Adjustments are provided to convert the goods totals from a Census basis to a BOP basis. | | | | |
| Exhibit 10 - Exports and Imports by Principal End-Use Commodity Category (Not Seasonally Adjusted) Information remains available in exhibit 13. | Exhibit 10 - Exports, Imports and Balance, Petroleum and Non-Petroleum End-Use Category Totals (Seasonally Adjusted) | | | | |
| | Substantially the same as old Exhibit 3. In addition, totals are provided on a BOP basis. Adjustments are provided to convert the goods totals from a Census basis to a BOP basis. | | | | |
| Exhibit 11 - Imports of Energy-Related Petroleum Products, Including Crude Petroleum | Exhibit 11 - Exports and Imports of Goods by Principal End-Use Category (Constant Dollars) (Seasonally Adjusted) | | | | |
| Information remains available in exhibit 17. No changes. | The same as old Exhibit 8. No changes. | | | | |
| Exhibit 12 - Exports, Imports and Merchandise Trade, By Selected Countries and Areas | Exhibit 12 - U.S. Trade in Goods (Not Seasonally Adjusted) | | | | |
| Information remains in Exhibit 14. | New exhibit that provides exports, imports, and balance of goods. Goods totals are provided on a Census basis and a BOP basis. Adjustments are provided to convert the goods totals from a Census basis to a BOP basis. Totals from old Exhibit 9. are provided. | | | | |
| Exhibit 13 - Exports and Imports By Principal SITC Commodity Groupings | Exhibit 13 - Exports and Imports of Goods by Principal End-Use Category (Not Seasonally Adjusted) | | | | |
| Information remains available in exhibit 15. | Substantially the same as old Exhibit 10. In addition, totals are provided on a Census basis and a BOP basis. Adjustments are provided to convert the goods totals from a Census basis to a BOP basis. | | | | |

| Exhibit 14 - Exports, Imports, and Merchandise Trade Balance, Advanced Technology Products | Exhibit 14 - Exports, Imports and Balance of Goods By Selected Countries and Areas (Not Seasonally Adjusted) |
|---|---|
| Information remains available in exhibit 16. No changes. | Substantially the same as old Exhibit 12. In addition, totals are provided on a Census basis and a BOP basis. Adjustments are provided to convert the goods totals from a Census basis to a BOP basis. |
| | Exhibit 15 - Exports, Imports of Goods by Principal SITC Commodity Groupings (Not Seasonally Adjusted) Substantially the same as old Exhibit 13. In addition, totals are provided on a Census basis and a BOP basis. |
| | Adjustments are provided to convert the goods totals from a Census basis to a BOP basis. |
| | Exhibit 16 - Exports, Imports, and Balance of Advanced Technology Products (Not Seasonally Adjusted) |
| | The same as old Exhibit 14. No changes. |
| | Exhibit 17 - Imports of Energy Related Petroleum Products, Including Crude Petroleum (Not Seasonally Adjusted) |
| | The same as old Exhibit 11. No changes. |

⁽¹⁾ Other private services consist of transactions with affiliated foreigners, for which no identification by type is available, and of transactions with unaffiliated foreigners. Transactions with unaffiliated foreigners consist of education services; financial services; insurance premiums and losses; telecommunications services; and business, professional, and technical services. The last category, business, professional, and technical services, consists primarily of advertising services; computer and data processing services; data base and other information services; research, development, and testing services; management consulting, and public relations services; legal services; construction, engineering, architectural, and mining services; industrial engineering services; installation, maintenance, and repair of equipment; and other services (including medical services). Detailed historical data on an annual basis are published in the September 1993 and September 1992 issues of the Survey of Current Business.

⁽²⁾ These Government transactions include both goods and services which cannot be separately identified. They are included to achieve a complete measure of goods and services, as well as to maintain comparability with the international transactions accounts.

Note: The data that appear in this exhibit are consistent with those in the quarterly international transactions accounts published in the Bureau of Economic Analysis' March, June, September, and December issues of the <u>Survey of Current Business</u> (Tables 1 and 3).

Exhibit 5. U.S. Services by Major Category -- Imports

⁽¹⁾ Reflects adjustments for timing, coverage, and valuation of the data compiled by the Census Bureau from documentation collected by the U.S. Customs Service. The major adjustments are to exclude military trade of the U.S. defense agencies (so as to avoid a double count in the U.S. balance of payments statistics), to include additional nonmonetary gold transactions not included in the Census Bureau export and import data, to include an estimate of inland freight in Canada and Mexico not in Census import data, and to account for differences between the seasonally adjusted and not seasonally adjusted annual values.

⁽¹⁾ Reflects adjustments for timing, coverage, and valuation of the data compiled by the Census Bureau from documentation collected by the U.S. Customs Service. The major adjustments are to exclude military trade of the U.S. defense agencies (so as to avoid a double count in the U.S. balance of payments statistics), to include additional nonmonetary gold transactions not included in the Census Bureau export and import data, to include an estimate of inland freight in Canada and Mexico not in Census import data and to account for differences between the seasonally adjusted and not seasonally adjusted adjusted annual values.

⁽²⁾ The petroleum products aggregated in the end—use commodity classification system include virtually the same energy related petroleum products as those aggregated in the SITC. The end—use petroleum products, however, include some products such as ethane, butane, benzene and toluene, which are included in "Manufactured Goods".

Exhibit 11. Exports and Imports of Goods by Principal End –Use Category (Constant Dollars 1987=100)

In millions of dollars. The values in this exhibit are subject to periodic change, reflecting revisions to the source information for monthly deflators.

(1) Reflects adjustments for timing, coverage, and valuation of the data compiled by the Census Bureau from documentation collected by the U. S. Customs Service. The major adjustments are to exclude military trade of the U.S. defense agencies (so as to avoid a double count in the U.S. balance of payments statistics), to include additional nonmonetary gold transactions not included in the Census Bureau export and import data, and to include an estimate of inland freight in Canada and Mexico not in Census import data.

Exhibit 13. Exports and Imports of Goods by Principal End-Use Category In millions of dollars. Details may not equal totals due to seasonal adjustment and rounding. (R) - Revised.

| (1) Detailed data are presented on a Consu | | | | | (X) | | |

⁽¹⁾ Detailed data are presented on a Census basis. The information needed to convert to a BOP basis is not available.

⁽²⁾ This exhibit is not additive. Selected countries are included in more than one area grouping. Indonesia is included in both OPEC and Other Pacific Rim; Venezuela is included in both OPEC and Other South/Central America.

⁽³⁾ The export totals reflect shipments of certain grains, oilseeds, and satellites that are not included in the country/area totals.

Exhibit 14. Exports, Imports and Balance of Goods By Selected Countries and Areas -- 1993

In millions of dollars. Details may not equal totals due to rounding. (--) Represents Zero. (R) Revised. (X) Not Applicable. (Z) Less than

⁽¹⁾ Details shown for these Energy—Related Petroleum Products are not available on a Balance of Payments Basis. These products include the following SITC commodity groupings; crude oil, petroleum preparations, and liquified propane and butane gas. See exhibit 15 under Mineral fuel for SITC system detail.

INFORMATION ON GOODS AND SERVICES

SERVICES

The statistics are estimates of service transactions between foreign countries and the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and other U.S. territories and possessions. Transactions with U.S. military, diplomatic and consolar installations abroad are excluded because they are considered to be part of the U.S. economy.

Service transactions are estimated at market prices. Estimates are seasonally adjusted when statistically significant seasonal patterns are present. No country or area detail is available due to the lack of adequate source data upon which to base estimates.

The revision policy is as follows: Each month a preliminary esimate will be released for the current month and a revised estimate for the immediately preceding month. After a revised month is released, no further changes will be made until the quarterly international transactions estimates, based on more complete source, data are released. The first monthly release which follows the quarterly international transactions release will contain revised estimates for the previous six months, in order to align the monthly estimates with the quarterly estimates. Annual revisions for the months and quarters are made in June, which incorporate updated source data and changes in estimating methodologies.

Quarterly and annual estimates of services are included as part of the U.S. international transactions accounts, published in the March, June, September and December issues of the <u>Survey of Current Business</u>. Releases are scheduled for June 15, September 13, and December 14, 1994. The Survey is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

TOTAL GOODS (Merchandise)

The total value of imports and exports is presented on both a Balance of Payments basis and a Census basis. The Census basis data are compiled from the documents collected by the U.S. Customs Service and reflect movements of goods into and out of the customs territory of the United States. The Balance of Payments basis data reflect timing, coverage and valuation adjustments to Census basis data reported on the f.a.s.- customs valuation basis to bring the data into line with the concepts and definitions used to prepare the international and national accounts. Broadly, the adjustments include changes in ownership that occur without goods passing into or out of the customs territory of the United States, adjustments necessary to supplement coverage of the Census basis data or to eliminate duplication of transactions recorded elsewhere (and more completely) in the international accounts, and adjustments to value transactions according to a standard definition.

The monthly end-use, commodity, and country and area data presented in this release are on a Census basis. This refers to Exhibits 7 - 17.

GOODS ON A CENSUS BASIS

The statistics reflect the movement of goods between foreign countries and the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands and U.S. Foreign Trade Zones. They include government and non-government shipments of goods, and exclude shipments between the U.S. and its territories and possessions, transactions with the U.S. military, diplomatic and

consolar installations abroad, U.S. goods returned to the U.S. by its Armed Forces, personal and household effects of travelers and in-transit shipments. The General imports value reflects the total arrival of merchandise from foreign countries that immediately entered consumption channels, warehouses or Foreign Trade Zones.

For imports, the value reported is the U. S. Customs Service appraised value of merchandise; generally, the price paid for merchandise for export to the U.S. Import duties, freight, insurance, and other charges incurred in bringing merchandise to the U.S. are excluded.

Exports are valued at the F.A.S.- free alongside ship value of merchandise at the U.S. port of export, based on transaction price including inland freight, insurance and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation.

Monthly data include actual month's transactions as well as a small number of transactions for previous months. Each month we revise the aggregate seasonally adjusted (current and constant dollar) and unadjusted export, import and trade balance figures, as well as the End-use totals for the prior month. SITC and country detail data are not revised monthly. The timing adjustment shown in Exhibits 14 and 15 is the difference between monthly data as originally reported and as recompiled.

Annual revisions for the months are made in June to reflect corrections received subsequent to the monthly revision. These revisions are reflected in totals, End-use, SITC and country summary data.

U.S./CANADA DATA EXCHANGE AND SUBSTITUTION

The data for U.S. exports to Canada are derived from import data compiled by Canada. The use of Canada's import data to produce U.S. export data requires several alignments in order to compare the two series.

- Coverage—Canadian imports are based on country of origin.
 U.S. goods shipped from a third country are included. U.S.
 exports exclude these foreign shipments. Effective January
 1994, Canadian imports include a measure of certain postal
 shipments not previously covered under Canadian merchandise
 trade. U.S. export coverage will not change and these
 shipments will be excluded. For January 1994, these shipments
 totaled \$59 million.
- 2. Valuation--Canadian imports are valued at point of origin in the U.S. However, U.S. exports are valued at the port of exit in the U.S. and include inland freight charges, making the U.S. export value slightly larger. Canada requires inland freight to be reported. When it is not, an estimate of 4.5 percent is used. Inland freight charges for January 1994 account for 4.4 percent of the value of U.S. exports to Canada.
- Reexports—U.S. exports include reexports of foreign goods.
 Again, the aggregate U.S. export figure is slightly larger. For January 1994, reexports to Canada were \$649 million.
- Exchange Rate—Average monthly exchange rates are applied to convert the published data to U.S. currency. For January 1994, the average exchange rate is 1.3421.
- 5. Other--There are other minor differences which are statistically insignificant, such as rounding error.

COMMODITY INFORMATION

Adjusted for Seasonal and Working-Day Variations

Commodities are initially classified under the Harmonized System (HS) which describes and measures the characteristics of commodities traded. Combining trade into approximately 140 export and 140 import end-use categories makes it possible to examine commodities according to their principal uses (See Exhibits 8 and 9). These categories are used as the basis for computing the seasonal and working-day adjusted data. These adjusted data are then summed to the six end-use aggregates for publication (Exhibit 7). These data are provided to the Bureau of Economic Analysis for use in the Balance of Payments and the National Income and Product Accounts.

The seasonal adjustment procedure is based on a model, which estimates the monthly movements as percentages above or below the general level of each end-use commodity series (unlike other methods that redistribute the actual series values over the calendar year). As a result, the sum of the seasonally adjusted monthly totals will differ slightly from the unadjusted calendar year total. Imports of petroleum and petroleum products are adjusted for the length of the month. Because of the extremely variable movements of the data series for aircraft, users studying data trends may wish to analyze aircraft separately from other trade. The seasonally adjusted three-month moving averages shown in Exhibit 3 are computed by summing the subject month, the two prior months, dividing by 3 and plotting at the subject month.

Adjusted for Price Change

Data adjusted for seasonal variation on a constant dollar basis (1987=100) are presented in Exhibit 11. This adjustment for price change is done at the lowest end-use level possible, then summed to the six published end-use aggregates. The deflators are primarily based upon the monthly price indexes published by the Bureau of Labor Statistics using techniques developed for the National Income and Product Accounts by the Bureau of Economic Analysis.

SITC Data

Commodity data appearing in Exhibit 15 are classified in terms of the Standard International Trade Classification (SITC) Revision 3. Data are arranged by principal commodity groupings.

Agricultural commodities consist of non-marine food products and other products of agriculture which have not passed through complex processes of manufacture, such as raw hides and skins, fats and oils, and wine. A few commodities such as essential oils, starches, casein, and albumin, considered to be agricultural by the U.S. Department of Agriculture, have been excluded from agriculture commodities and are included in manufactured goods where they are classified in the SITC.

Manufactured goods conform to the SITC sections that include chemicals and related products, N.S.P.F.; manufactured goods classified chiefly by material; machinery and transport equipment; miscellaneous manufactured articles, N.S.P.F.; and commodities and transactions not classified elsewhere.

Reexports are foreign merchandise entering the country as imports and which at the time of exportation are in substantially the same condition as when imported. Reexports, included in overall export totals, appear as separate line items in Exhibit 15.

Advanced Technology Products (ATP)

About 500 of some 22,000 commodity classification codes used in reporting U.S. merchandise trade are identified as "advanced technology" codes and they meet the following criteria:

- 1. The code contains products whose technology is from a recognized high technology field (e.g., biotechnology).
- These products represent leading edge technology in that field.
- 3. Such products constitute a significant part of all items covered in the selected classification code.

The aggregation of the commodities results in a measure of advanced technology trade which appears in Exhibit 16. This product and commodity-based measure of advanced technology differs from broader SIC industry-based measures which include all commodities produced by a particular industry group, regardless of the level of technology embodied in the commodities.

⁽¹⁾ Includes agricultural, forestry, fishery products, mineral commodities, scrap, waste, used or second—hand merchandise and timing adjustements.

⁽²⁾ Significant data are compiled for the District of Columbia because there are concentrations of entities domiciled there, such as, embassies of foreign governments, purchansing agents, for foreign companies and countries that arrange for exports of goods.

⁽³⁾ Includes cases where no valid zip code was reported on Shipper's Export Declaration and also includes prior month's revision to exports to Canada.

Exhibit 2A. Origin of Movement of U. S. Exports of Goods by State by SIC-Based Product Code Groupings, Not Seasonally Adjusted: January 1994

In millions of dollars. Foreign Trade Zone (FTZ) shipments are included in the U. S. total and distributed among individual state and territories. Separate FTZ total line is for reference only. Details may not equal totals due to rounding and other statistical procedures. (—) Represents zero. (X) Not applicable. (Z) Less than one—half unit of measurement shown.
